

Package leaflet:

**AquaActiv QuickFit**

The immune system of ornamental fish is often weakened through stress factors. Frequently this is why infections occur without a recognizable reason. Causes can be: Transport of the fish, poor environmental conditions, such as an unbalanced diet, water values that are not optimal, etc. The weakened ornamental fish reacts with susceptibility to pathogens that can be repelled by a strengthened immune system.

This is where **AquaActiv QuickFit** is effective. Thanks to its balanced composition with 40 % aloe vera extract, as well as iodine and vitamin C **AquaActiv QuickFit** strengthens the immune system of the ornamental fish, and makes it more resistant to disease; it also promotes fertility and well-being.

The aloe vera extract supports regeneration of the skin and thus contributes to wound healing and has an anti-inflammatory effect. The varied active ingredients from the sap of the Aloe vera leaf increase resistance and protect against the effects of stress.

The iodine compound contained in **AquaActiv QuickFit** promotes formation of pituitary gland hormones and thus prevents disorders of the pituitary gland, and prevents deformation of vertebral cartilage, gill cartilage and gill covers. The vegetative nerve

system is strengthened. Through vitamin C **AquaActiv QuickFit** strengthens the immune system. A vitamin C deficiency can result in delayed growth and internal bleeding.

Areas of application:

Use **AquaActiv QuickFit** regularly to strengthen the immune system of your fish. Specific administration if there are stress situations is particularly recommended:

- For new stock
- After transport
- After surviving an illness
- To heal wounds

Application and dosage: Every 14 days and after particularly stressful situations add 50 ml per 1000 l of pond water. The specified quantity must be diluted with pond water and distributed uniformly on the surface of the pond with a watering can.

Important instructions:

- Shake before use
- A dark colour or light bottom sediment in this natural product is normal.
- Protect **AquaActiv QuickFit** from light and heat
- Do not overdose **AquaActiv QuickFit**
- Do not use the product after the best before date
- Use up the product within 6 months of opening the package
- Keep out of the reach of children.
